FOREWORD

The Missouri Division of Alcohol and Drug Abuse is pleased to present this Tenth Edition of the *Status Report on Missouri's Alcohol and Drug Abuse Problems*.

The Status Report compares state and national rates of alcohol, tobacco, and other drug use. It highlights some of the consequences of substance abuse as reported by various public entities. Trend data and charts illustrate the changes in the magnitude of substance abuse problems during the last several years. This edition also presents estimates of the number of Missouri residents needing alcohol and drug abuse treatment services, based on recent surveys and studies conducted in Missouri.

The Division of Alcohol and Drug Abuse contracts with substance abuse treatment programs to provide publicly supported services, and this report summarizes the characteristics of the clients receiving those services. Additional information regarding treatment and prevention services is available from the Division's regional offices located in Kansas City, St. Louis, Springfield, Jefferson City, and Rolla. The addresses and phone numbers of these offices are listed on the state map in the appendix of this report.

Inquiries and comments pertaining to the Status Report should be directed to the Division's Research and Statistics unit. The three most recent editions are accessible on the web through the "Reports" webpage of the Division at:

<http://www.dmh.missouri.gov/ada/rpts/>

Sincerely,

A handwritten signature of Michael Couty in black ink, located below the word "Sincerely,".

Michael Couty

MC/RS/hd

ACKNOWLEDGMENTS

The Missouri Division of Alcohol and Drug Abuse would like to recognize individuals from other agencies who contributed current data for this Tenth Edition. The Division is grateful for the special programming these administrators and analysts developed to extract the data needed to meet the report's criteria.

INTRODUCTION

The *Status Report on Missouri's Alcohol and Drug Abuse Problems* is issued annually by the Missouri Department of Mental Health, Division of Alcohol and Drug Abuse. The primary purposes of this report are 1) to provide policy makers, planners, funding sources, service providers, and researchers with a broad set of quantifiable measures and indicators of substance use, abuse, and addiction in Missouri; and 2) to provide comprehensive data describing the clients receiving services in treatment programs administered by the Missouri Division of Alcohol and Drug Abuse.

Problem indicators and treatment data in this report are provided at several levels of geographic detail to meet the diverse needs of the readers. The largest variety of data is provided at a state-wide level of analysis. Tables and charts show trends by presenting Missouri data for the most current year available and several prior years. Missouri and U.S. prevalence data is presented to show how current use of alcohol, tobacco, and illicit drugs in Missouri compares to nationwide usage rates for specific age groups. Indicator and treatment data is provided in three-year tables for each of the five Division of Alcohol and Drug Abuse planning regions and 20 sub-region Service Areas. These regions and service areas are illustrated on the Division's map in the Appendix of this report. Identical three-year data tables are also provided for Missouri's 115 counties, arranged according to federal FIPS county code. Each data element represents a calendar year unless specified as "FY" for state fiscal year (July 1 through June 30) or "FFY" for federal fiscal year (October 1 through September 30).

New federal and state laws and enforcement regulations have been enacted during the past several years to restrict youth access to tobacco. One section of the report summarizes the current status of tobacco regulation, merchant education, and youth tobacco use in Missouri.

PROBLEM OVERVIEW AND MEASUREMENT

Household interviews, telephone surveys, and school surveys are typically used to estimate the prevalence of alcohol and other drug use. These instruments may also include questions and items which identify substance dependence and abuse, particularly when it is important to estimate the number of individuals needing substance abuse services. Standard surveys do not easily reach some groups, such as non-household adults and non-student adolescents. Additional studies or data might be used to augment the estimates to account for these populations. Authorities use a variety of data as measures and indicators of alcohol and other drug abuse. Some are direct measurements of substance abuse events such as consumption of alcohol and drugs during pregnancy, impaired driving crashes, and emergency room visits for drug overdoses. Other events and conditions—such as unemployment, domestic violence, and exposure to certain communicable diseases—have a statistical correlation but not always a causal relationship to substance abuse. Because alcohol and drug abuse have a profound impact on a wide range of quality of life factors, a broad array of data is used to quantify the impacts.

Prenatal alcohol, tobacco, and drug exposure can cause low birth weight, newborn addiction, serious birth defects, mental retardation, and lifelong impairments. Although this report includes

hospital data on prenatal exposure, the use of alcohol and harmful drugs by pregnant women is known to be substantially under-reported. Several diseases, including hepatitis-B, hepatitis-C, tuberculosis, and HIV/AIDS, are sometimes spread as a result of substance abuse. Alcohol and drug related deaths and hospitalizations are quantified based on the International Classification of Diseases (ICD) coding developed by the World Health Organization. Mortality data began being coded using ICD-10 in 1999, requiring a retrospective adjustment of death estimates for earlier years. Hospital and emergency department data continue to be based on the ICD-9 codes.

Substance abuse significantly impacts the law enforcement and criminal justice systems. Victims of violence are more likely to be seriously injured if their perpetrators have consumed alcohol and/or other drugs [73]; see “References” in the appendix. Illicit drug manufacturing and distribution create dangerous environments. Many property crimes are drug related. Traffic crashes are categorized according to whether they resulted in fatalities, injuries, or property damage and whether there was the presence of any of the standard conditions that are known to contribute to their occurrence including, in Missouri, alcohol or drug involvement. Beginning in 2001, changes in the methodology used by Missouri law enforcement agencies for submitting crime and arrest data to the federal Uniform Crime Report (UCR) program have eliminated duplicate counts of crimes such as drug offenses that are investigated by more than one law enforcement agency. Drug offenders and persistent DUI/DWI offenders continue to comprise a substantial portion of incarcerations and probation or parole openings.

Alcohol and drug abuse contributes to interpersonal conflict, family disintegration, domestic abuse, and emotional suffering. One-half of domestic violence perpetrators are believed to be addicted to alcohol or drugs, and an estimated 80 percent of child abuse cases involve parental substance abuse [63]. The inclusion of a variety of juvenile court data in this report underscores the strong connection between familial substance abuse and other family dysfunctions. Perhaps most dramatic is the number of children who must be removed from their homes because their parents or guardians expose them to drugs or have substance abuse problems.

Substance abuse is correlated with low income. Public school dropout rates and unemployment rates are included as indices. Vocational rehabilitation admissions in this report identify the number of substance abuse treatment clients who also received vocational education and training.

Criteria for identifying substance dependence and abuse are specified in the *Diagnostic and Statistical Manual of Mental Disorders, 4th Edition*. A recent national study estimated that 7.3 percent of the U.S. population age 12 and older were dependent on or abused alcohol or illicit drugs in 2001. The study also found that 7.3 percent of the population age 18 and older had serious mental illness, and one-fifth of the mentally ill had a co-occurring substance abuse problem [69].

According to a three-year federally funded treatment needs assessment completed by Research Triangle Institute in 2003, an estimated 491,223 Missouri residents (461,845 adults and 29,378 adolescents) need treatment due to their substance abuse or dependency. This represents 10.5 percent of the Missouri population age 12 and older, somewhat higher than the national rate of 7.3 percent cited above. The study also found that additional large numbers of Missourians have alcohol and drug use patterns suggesting the need for some form of less intensive intervention [51, 52]. The importance of substance abuse treatment is discussed in the next section.

ECONOMIC COSTS AND TREATMENT BENEFITS

Aside from the vast social and emotional suffering inflicted, untreated substance abuse strains resources and impedes economic growth. According to economic studies, the societal costs of substance abuse in the United States were \$184.6 billion for alcohol abuse in 1998 [60], \$160.7 billion for drug abuse in 2000 [74], and \$157 billion for cigarette smoking in 1999 [57]. These nationwide costs total \$502.3 billion per year, and Missouri's proportional share of this burden is estimated to be \$10 billion. On a per capita basis, substance abuse has an annual cost of almost \$1,800 per Missouri resident, including more than \$1,200 per resident for alcohol and drug abuse. These costs include loss of productivity due to substance abuse related illnesses and deaths, motor vehicle crashes, fire destruction, crime, fetal alcohol syndrome, and AIDS. A report issued in 2001 by the National Center on Addiction and Substance Abuse at Columbia University concluded that 12.5 percent of Missouri's state spending in 1998—over \$1.3 billion—was related to alcohol and drug abuse. However, almost 97 percent of this amount was used to “shovel up the wreckage of substance abuse and addiction” while only 3.2 percent was used to prevent substance abuse and provide treatment services. The study found that the impact of substance abuse is especially severe in the state sectors of justice and corrections, education, health, child and family assistance, mental health, public safety, and employment [49].

Substance abuse is treatable, yet private treatment is prohibitively expensive for the disproportionate number of people needing treatment who have low incomes and lack insurance coverage. In 1999, clients in 64 percent of substance abuse treatment admissions nationwide had no health insurance coverage for alcohol and drug abuse treatment and relied on public support. Medicaid provided coverage for 14 percent of clients, while only 22 percent had private insurance or other forms of payment [65]. Similarly, a federal study that included a survey of Missouri treatment programs and clients in 2002 indicated that 78 percent of the clients were treated in certified non-profit programs that utilize state and federal funds, while only 22 percent were treated in private programs [68]. These figures suggest that approximately 78 percent of the 461,845 adults and 29,378 adolescents cited earlier in the 2003 prevalence study need publicly supported services [51]. Programs funded by the Division of Alcohol and Drug Abuse were able to provide treatment services to 37,072 adults and 3,885 adolescents in fiscal year 2003, only 10.3 percent of the adults and 17.0 percent of the adolescents needing those services.

Treatment for substance abuse has a good success rate and is cost effective. In 2002, Missouri completed a study of clients receiving treatment in programs funded by the Division of Alcohol and Drug Abuse [48]. The follow-up data identified several positive treatment outcomes. Two-thirds of the clients were not using alcohol or drugs six months after entering treatment, and three-fourths of those not using at six months were also not using one year after entering treatment. Clients showed improvement in the areas of earned income, physical and mental health, family and social relations, and legal status. Studies from other states and from employee assistance programs have documented substantial cost savings and other benefits from substance abuse treatment [64]. A follow-up study of 3,000 treatment clients in California showed that the cost of treatment averaged \$1,400 but yielded savings of about \$10,000 per client [62]. An Oregon study found that the state reduces its costs for tax-supported health, corrections, and welfare services by \$5.62 for each dollar spent on those who complete treatment [1]. The Center for Substance Abuse Treatment has estimated that a per capita expenditure of \$45 per year could provide services to everyone needing treatment for addictive disorders—a small fraction of the estimated \$1,200 per capita cost incurred for untreated alcohol and drug abuse [63].

DATA HIGHLIGHTS

New Missouri Household Data

- New state data from the National Survey on Drug Use and Health, formerly the National Household Survey on Drug Abuse was released in 2003. Missouri data is available for binge drinking and current use of alcohol, cigarettes, smokeless tobacco, any illicit drug, and marijuana. The most recent analysis combines Missouri data from the 2000 and 2001 national surveys. The results can be compared to the previous analysis, which used Missouri data from the 1999 and 2000 surveys [66, 67]. Some of the findings are:
- **Alcohol:** Among the population ages 12 and older, Missouri's estimated percentage of current drinkers (those consuming alcohol within 30 days prior to the survey) increased from 44.8 percent to 46.7 percent, compared to 48.3 percent nationally. In this same age group, binge drinking—consuming at least five drinks on a single drinking occasion at least once in the preceding 30 days—decreased slightly in Missouri from 20.2 percent to 20.0 percent. The national rate in 2001 was 20.5 percent. Alcohol use among adolescents 12-17 years of age increased from 16.1 percent to 18.0 percent, surpassing the national rate of 17.3 percent in 2001. Binge drinking among Missouri adolescents also increased, jumping from 10.5 percent to 12.0 percent. Nationally, 10.6 percent of adolescents were binge drinkers in 2001. Current alcohol use among young adults in the 18-25 age group increased in Missouri from 58.9 percent to 59.7 percent. Nationally, current alcohol use in this age group was 58.8 percent in 2001. Binge drinking among young adults in Missouri declined from 39.1 percent to 38.8 percent, almost identical to the nationwide figure of 38.7 percent in 2001. Among Missouri's population over age 25, current alcohol use increased from 46.4 percent to 48.4 percent, but remained lower than the 2001 national average of 50.8 percent. Binge drinking in this age group declined in Missouri from 18.3 percent to 17.9 percent, compared to 18.8 percent nationwide in 2001. Alcohol use and binge drinking increased in all age groups in the United States from 2001 to 2002.
 - **Marijuana:** According to the analysis of the combined 2000 and 2001 Missouri data from the national surveys, Missouri continues to have a lower prevalence of marijuana use than the national average. Among adolescents and adults 12 years of age and older, 4.4 percent of Missouri residents were current marijuana users, compared to 5.4 percent of adolescents and adults nationwide in 2001. Marijuana use among Missouri adolescents 12-17 years of age increased from 6.6 percent to 7.3 percent, but 8.0 percent of this age group in the U.S. were current marijuana users in 2001. Among young adults 18-25 years of age, marijuana use decreased in Missouri from 13.6 percent to 13.0 percent. This figure was three percentage points lower than the U.S. rate of 16.0 percent in 2001. Among adults over age 25, 2.6 percent of Missouri residents and 3.2 percent of adults over age 25 nationally were currently using marijuana in 2001.
 - **Tobacco:** Among Missouri adolescents 12-17 years of age, current use of cigarettes or another tobacco product decreased from 19.4 percent in 2000 to 17.2 percent in 2001, compared to a nationwide rate of 15.1 percent. Cigarette smoking comprised most of the tobacco use and declined from 15.1 percent in 2000 to 14.2 percent of this age group in 2001 in Missouri. Among U.S. adolescents, 13.0 percent were smokers in both 2001 and 2002. Tobacco use by Missouri young adults 18-25 years of age declined from 52.0 percent in 2000 to 49.1 percent in 2001, and cigarette smoking decreased from 45.6 percent to 43.1

percent. During this same time period, the nationwide smoking rate for young adults remained lower than the Missouri rate, yet increased from 38.3 percent in 2000 to 39.1 percent in 2001. The U.S. rate increased again in 2002 to 40.8 percent. Missouri's cigarette smoking rate among adults over age 25 decreased from 28.3 percent to 26.9 percent in 2001, but remained higher than the national rate of 24.2 percent.

- Tobacco use is also measured on another national survey through the CDC's Behavioral Risk Factor Surveillance System [58]. In 2002, 26.5 percent of Missouri adults over age 18 were current smokers, compared to 23.0 percent nationwide. Nine states had higher smoking rates than Missouri, while 40 states and the District of Columbia had lower rates. Approximately 594 million packs of cigarettes were sold in Missouri in state fiscal year 2003. [44].
- The Department of Elementary and Secondary Education administered the biannual Youth Risk Behavior Survey in 2003 to Missouri public school students in grades 9-12 [9]. Overall, current (past month) use of alcohol increased and binge drinking decreased from the 2001 survey. The drinking rates increased the most for high school seniors, climbing from 52.2 percent in 2001 to 57.3 percent in 2003. Likewise, past-month binge drinking rates among high school seniors decreased the least, dropping by only one percentage point to 38.9 percent. Thus, approximately two-thirds of the high school seniors who drank had engaged in binge drinking in the month prior to the survey. Based on the results of the Monitoring the Future national survey, drinking rates of Missouri high school seniors were considerably higher than national rates [2]. Compared to Missouri's 57.3 percent, only 47.5 percent of high school seniors overall in the United States were current drinkers in 2003. Nationally, 27.9 percent of high school seniors reported binge drinking in the two weeks prior to the survey, a figure that cannot be directly compared to Missouri's past-month binge drinking rate. Marijuana use among Missouri high school students overall decreased from 24.4 percent in 2001 to 21.8 percent in 2003, but use increased slightly among seniors to 25.4 percent. This figure was several percentage points higher than the 21.2 percent national rate of current marijuana use by high school seniors in 2003. Cigarette smoking decreased in Missouri among students in grades 9-12, falling from 30.3 percent in 2001 to 24.8 percent in 2003. The most dramatic decrease occurred among high school seniors, who had a cigarette smoking rate of 21.4 percent—lower than the rates for freshmen, sophomores, and juniors. Cigarette smoking by Missouri's high school seniors was also lower than the national rate of 24.4 percent. Cocaine use also declined among high school students, with current use of 2.7 percent for grades 9-12 combined. Seniors had the lowest rate of current use at 2.1 percent, identical to the national rate for high school seniors.
- Binge drinking among students at 12 Missouri public universities and colleges increased between 2002 and 2003. The CORE Institute Survey found that 48.2 percent of the students surveyed in 2003 were binge drinkers, defined as consuming at least five alcoholic drinks on a single drinking occasion at least once during the two weeks preceding the survey. The 2002 binge drinking rate was 46.3 percent [75].
- Alcohol consumption among the Missouri population age 14 and older remained virtually unchanged between 1999 and 2000 at 2.25 gallons of ethanol (absolute alcohol) per capita. Per capita consumption nationwide for the same age group was 2.18 gallons in 2000 [59].

- Reductions in substance abuse during pregnancy were reported in 2002 [21].
 - The reported number of mothers of newborns who drank during their pregnancies decreased from 553 in 2001 to 517 in 2002. Although studies have confirmed that alcohol use during pregnancy is considerably under-reported, the 517 documented cases are the fewest reported in many years.
 - The reported number of mothers of newborns who smoked during their pregnancies decreased from 13,761 in 2001 to 13,607 in 2002. This is also the lowest number of cases reported in recent years and represents a slight decrease from 182.8 reports per 1,000 live births in 2001 to 181.0 reports per 1,000 live births in 2002.
- The Department of Mental Health's CTRAC system collects information on the pregnancy status of clients entering substance abuse treatment programs. Consistent with federal requirements, the Division admits pregnant women into treatment programs on a priority basis. The unduplicated count of pregnant women admitted in recent years has increased steadily from 176 in fiscal year 1998 to 305 in fiscal year 2003 [26].
- The high school dropout rate for students in grades 9-12 continued a multi-year decline. The dropout rate decreased from 3.9 percent in the 2001-2002 school year to 3.6 percent in 2002-2003 [11].
- After increasing for several years, new reported cases of Hepatitis C reached a plateau in 2001 and declined to 1,386 in 2002 [23]. The National Institute on Drug Abuse estimates that 60 percent of Hepatitis C cases have resulted from injection drug use, with many of the exposures originating in earlier years [61].
- Deaths with an underlying medical cause of drug abuse increased from 378 in 2001 to 454 in 2002. Alcohol related deaths decreased from 348 in 2001 to 326 in 2002 [14].
- Alcohol related traffic crashes increased from 8,393 in 2001 to 8,478 in 2002. Fatal crashes attributed to alcohol intoxication reached 268 and caused 291 deaths, the largest number of alcohol related traffic deaths recorded in more than a decade [37, 40].
- In 2002, there were 868 drug related crashes, the most recorded since 1996. There were 26 deaths among 21 fatal drug related crashes [38, 41].
- Missouri had 39,932 arrests in 2002 for driving under the influence of alcohol or drugs, a substantial increase from the 36,129 DWI/DUI arrests reported in 2001. Drug arrests decreased from 42,823 in 2001 to 41,757 in 2002. These consisted of 7,875 arrests for the sale or manufacturing of drugs and 33,882 arrests for possession of illicit drugs [33, 34]. However, law enforcement agencies made 2,749 seizures of methamphetamine labs, chemicals, equipment, and dumpsites, compared to 2,130 in 2001 [35].
- Prison admissions for drug offenses increased from 5,212 in fiscal year 2002 to 5,861 in fiscal year 2003. Incarcerations for driving while intoxicated decreased slightly from 1,239 in fiscal year 2002 to 1,193 in fiscal year 2003 [4]. The Department of Corrections provided substance abuse treatment to 6,235 inmates in fiscal year 2003. Probation and parole openings for drug offenses increased from 10,421 in fiscal year 2002 to 11,996 in fiscal year 2003, and openings for DWI offenses increased from 2,490 to 2,703 [5].

percent. During this same time period, the nationwide smoking rate for young adults remained lower than the Missouri rate, yet increased from 38.3 percent in 2000 to 39.1 percent in 2001. The U.S. rate increased again in 2002 to 40.8 percent. Missouri's cigarette smoking rate among adults over age 25 decreased from 28.3 percent to 26.9 percent in 2001, but remained higher than the national rate of 24.2 percent.

- Tobacco use is also measured on another national survey through the CDC's Behavioral Risk Factor Surveillance System [58]. In 2002, 26.5 percent of Missouri adults over age 18 were current smokers, compared to 23.0 percent nationwide. Nine states had higher smoking rates than Missouri, while 40 states and the District of Columbia had lower rates. Approximately 594 million packs of cigarettes were sold in Missouri in state fiscal year 2003. [44].
- The Department of Elementary and Secondary Education administered the biannual Youth Risk Behavior Survey in 2003 to Missouri public school students in grades 9-12 [9]. Overall, current (past month) use of alcohol increased and binge drinking decreased from the 2001 survey. The drinking rates increased the most for high school seniors, climbing from 52.2 percent in 2001 to 57.3 percent in 2003. Likewise, past-month binge drinking rates among high school seniors decreased the least, dropping by only one percentage point to 38.9 percent. Thus, approximately two-thirds of the high school seniors who drank had engaged in binge drinking in the month prior to the survey. Based on the results of the Monitoring the Future national survey, drinking rates of Missouri high school seniors were considerably higher than national rates [2]. Compared to Missouri's 57.3 percent, only 47.5 percent of high school seniors overall in the United States were current drinkers in 2003. SERVICES OF THE DIVISION OF ALCOHOL AND DRUG ABUSE

The Division of Alcohol and Drug Abuse supports an array of prevention, intervention, and treatment services. In the state fiscal year 2003 (July 1, 2002 through June 30, 2003), the Division of Alcohol and Drug Abuse contracted with service providers for substance abuse prevention, detoxification, residential and outpatient treatment, compulsive gambling counseling, and traffic offender services. Major funding sources for these programs are from federal Substance Abuse Prevention and Treatment block grant funds, federal Safe and Drug-Free Schools and Communities Act funds, federal and state Medicaid payments, Missouri general revenue, Compulsive Gambling funds, and Health Initiative funds.

The Division maintains a comprehensive prevention system based on a risk and protective factor framework. The Division's two strategic goals for prevention are (1) delaying onset of substance use and (2) reducing the incidence and prevalence of binge drinking among college-age youth. The Division's focus for prevention includes implementing an array of evidence-based programs in public schools and communities and building the capacity of coalitions to address local substance use issues. The prevention system includes contracted services for coalition capacity building, community-based alternatives and services for high-risk youth, and school-based prevention and intervention services. In addition, the Division partners with other state agencies to provide a continuum of prevention services throughout the state.

The Division administers treatment services through contracts with a network of specialized programs. The services are provided to individuals who abuse or are dependent on alcohol or other drugs, to their family members who are adversely affected, and to compulsive gamblers. In fiscal year 2003, these programs provided general treatment services to 22,876; Comprehensive Substance Treatment and Rehabilitation (CSTAR) services to 15,486; Substance Abuse Traffic Offender Program (SATOP) assessments to 35,576 (including treatment/intervention services to 11,671); and compulsive gambling treatment to 373 [26, 27]. The CSTAR model provides intensive outpatient treatment and has programs tailored for adolescents, women and their children, and the general adult populations. Individuals are referred to SATOP stemming from an arrest for driving under the influence of alcohol or other drugs. Aside from the intervention services, SATOP also provided educational programs to 19,560 individuals.

New admissions and readmissions in fiscal year 2003 totaled 40,460, and the remainder of the 50,375 individuals identified above who received treatment or intervention services were already in treatment at the beginning of the fiscal year. The 40,460 admissions included 38,266 for substance abuse or dependency treatment; 1,874 codependency admissions for people adversely affected by a family member's alcohol or drug problem; and 320 whose primary problem was compulsive gambling. The clinical data presented throughout this report summarizes the 38,266 client admissions for treatment of substance abuse or dependency.

Stable, affordable, drug-free housing is an important component of recovery for some clients after they attain sobriety. The Division coordinates 58 self-run, self-supported Oxford Houses for clients who have completed treatment. There are 47 houses for men and 11 for women, with a total capacity of 416 residents.

TREATMENT TRENDS

Admissions to Division of Alcohol and Drug Abuse programs for substance abuse and addiction treatment totaled 38,266 in fiscal year 2003, a decrease from the 39,021 admissions in fiscal year 2002 and the peak 39,912 admissions in fiscal year 2001 [26].

Despite the overall reductions, admissions for women continued to climb, increasing from 11,960 in fiscal year 2002 to 12,100 in fiscal year 2003. The number of treatment admissions for pregnant women increased from 356 in fiscal year 2002 to 369 in fiscal year 2003 and represented an unduplicated count of 305 women. A total of 85 babies were born to women in the CSTAR programs for women and children, and 76 were documented to be healthy and drug-free at birth.

While treatment admissions for Caucasians, African Americans, and Native Americans/Alaskans declined in fiscal year 2003, record-high numbers of treatment admissions were recorded for Hispanics—283—and Asians/Pacific Islanders—72. Treatment clients averaged 33.5 years of age, and almost 29 percent were 30-39 years old.

Individuals who were employed when entering treatment accounted for only 30 percent of all admissions, while 18 percent were unemployed and 52 percent were not seeking employment. For the fourth consecutive year, at least 20,000 treatment admissions were by individuals who were not in the labor force.

Admissions among clients with three or more arrests within the last two years continued to climb, reaching 16,938 in fiscal year 2003 and 44 percent of all treatment admissions. In fiscal year 2003, criminal justice referrals accounted for 15,833 treatment admissions. Clients who did not identify an external referral source—and those encouraged to seek treatment by family or friends—accounted for 12,277 admissions. Mental health providers were the origin of 5,155 treatment referrals and healthcare providers were the source of 1,026. Referrals from schools more than doubled—from 93 in fiscal year 2002 to 193 in fiscal year 2003.

Admissions for injection drug users totaled 3,299 in fiscal year 2003, a slight decrease from the 3,380 admissions in fiscal year 2002. Over 35 percent injected drugs daily, yet almost one-half reported injecting drugs less than once per week.

Alcohol continued to lead treatment admissions, accounting for 15,470 in fiscal year 2003 for primary drug of abuse. Marijuana admissions remained second with 9,726 and cocaine was third with 6,593. Total cocaine admissions increased, yet admissions for crack decreased slightly. Methamphetamine admissions ranked fourth with 3,607, a five percent increase from fiscal year 2002. Heroin remained the fifth most frequently mentioned primary drug of abuse with 1,362 admissions, a decrease from the 1,536 admissions recorded in fiscal year 2002. But admissions for other narcotics and analgesics increased from 498 in fiscal year 2002 to 590 in fiscal year 2003. Treatment admissions for phencyclidine (PCP) increased sharply from 218 in fiscal year 2002 to 314 in fiscal year 2003. Treatment admissions for other illicit drugs, prescription medications, and over-the-counter medications increased from 114 in fiscal year 2002 to 138 in fiscal year 2003.

YOUTH AND TOBACCO IN MISSOURI

Youth Access Laws

- **No Tobacco Sales to Persons under Age 18:** Missouri state law prohibits the selling of tobacco products to anyone under the age of 18 years. Merchants are also required to post a state law sign at every tobacco display, including cigarette machines. (RSMO 407.926-407.927)
- **State Law Enforcement:** The Department of Public Safety—Division of Liquor Control has the authority to enforce the state's laws related to the control and sale of tobacco. (RSMO 407.934)
- **Vending Machines:** As of January 1, 2002, vending machines are required to be located within employee's line of sight or be equipped with a locking device. Vending machines located in areas where patrons must be over the age of 18 or in places not generally accessible to the general public are exempt from this requirement. (RSMO 407.931)
- **Minor Possession:** No person under the age of 18 shall purchase, attempt to purchase, or possess tobacco products unless in the course of employment. Persons under the age of 18 will have their tobacco products confiscated. (RSMO 407.933)
- **Tobacco Registry:** The Department of Revenue is required to establish and maintain a listing of establishments that sell tobacco products in the state. (RSMO 407.934)
- **Federal Regulation:** Federal Synar regulation, administered by the U.S. Department of Health and Human Services, requires all states to establish laws that make it unlawful to sell or distribute tobacco products to any individual under the age of 18 years and to enforce such laws in a manner that can reasonably be expected to reduce youth access to tobacco products. It also requires states to annually measure compliance through random, unannounced inspections. All states are expected to achieve a violation rate of no more than 20 percent. (42 U.S.C. 300x-26 and 45 C.F.R. 96.130)

Current Status

- **Youth Lifetime Use:** In 2003, nearly 67 percent of Missouri high school students surveyed reported having tried cigarette smoking – down from the 76.7 percent reporting lifetime use in 2001 but still higher than the national average of 53.7 percent [2, 9].
- **Youth Current Use:** In 2003, 21.4 percent of Missouri high school seniors reported current use of cigarettes, down significantly from 35.4 percent in 2001. While during most of the 1990's Missouri's rate of high school senior smokers was higher than the corresponding national average, the most recent rate reported for the state falls below the national average of 24.4 percent.

- **Merchant Compliance:** In 2003, an estimated 8.9 percent of Missouri merchants unlawfully sold cigarettes and smokeless tobacco to individuals under the age of 18 years—down somewhat from the previous year's rate of 11.0 percent. For the past four years, the State has realized a non-compliance rate below the long-term Synar target rate of 20%. The State has used a combination of law enforcement and merchant education activities in order to bring down the non-compliance rate from a high of 40 percent (baseline year) to a rate less than the 20 percent target rate [25].

State Initiatives Aimed at Youth Tobacco Access

- Law Enforcement Surveillance:** The Division of Liquor Control has 33 field agents to enforce both alcohol and tobacco laws. Citizen or local law enforcement complaints initiate surveillance investigations. During FY2003, 25 arrests and one guilty disposition were made for violations of Sale of Tobacco to Minors (407.931.3); 370 arrests and 23 guilty dispositions were made for violations of Possession or Attempt to Purchase Tobacco by Minors (407.933.1); and two arrests but zero guilty dispositions were made for violations of Misrepresentation of Age to Purchase Tobacco by Minors (407.933.2). The Division of Liquor Control also provides server training covering alcohol and tobacco laws to all interested retailers.
- Merchant Education Program:** During 2003, the Department of Mental Health—Division of Alcohol and Drug Abuse conducted a comprehensive merchant education program that included outlet educational visits, compliance checks, and feedback to clerks and owners/managers [25].

Educational Visits: Visits to tobacco outlets were made to provide merchants with information regarding the state's laws on youth access to tobacco products. From April through June 2003, the prevention teams conducted walk-in visits to tobacco retailers in the state. These retailers generally received three visits during this time period. Informational brochures, tobacco signs, and calendars were given to store employees. In total, 23,858 walk-in visits were conducted in which contact was made with the store owner, manager, and/or other employees. Owner contacts numbered 2,008 and manager contacts numbered 7,107. Over 6,000 outlets received at least one visit.

Compliance Checks (includes Synar checks): Compliance checks are conducted in which a youth age 16 or 17 attempts to purchase a tobacco product. If the mode of purchase is over-the-counter, the event is considered a successful unconsummated buy if the retail clerk fails to request ID or the age of the youth prior to requesting payment for the tobacco product and fails to refuse the sale. If the mode of purchase is vending machine, the event is considered a successful unconsummated buy if the youth is able to insert a quarter into the vending machine and leave the premises without intervention by store employees whereby they request ID or the age of the youth. During these checks, the youth inspectors purchase no tobacco products. If the check results in a successful (unconsummated) buy, the clerk receives a caution card. The check is followed-up by a caution letter to the owner/manager generally within two weeks of the check. If the store employee refuses the sale, then the store employee is given a congratulatory card. These checks are followed up with a congratulatory letter to the owner/manager of the retail establishment. From August 1, 2002 through July 31, 2003, there were 4,719 checks (including Synar checks), with 502 (10.64%) resulting in the issuance of caution cards.

* Due to implementation of federal Uniform Crime Reporting in 2001, data totals in these categories are not comparable with pre-2001 totals.

** Prior to calendar year 2001, some lab seizure counts were duplicated due to participation and reporting by multiple law enforcement agencies, including the Department of Public Safety's Drug Task Forces, Missouri State Highway Patrol, and the federal Drug Enforcement Administration. Beginning in 2001 with Uniform Crime Reporting, each lab seizure, chemical or equipment seizure, and dumpsite clean-up are counted once.

*** SATOP clients referred to Clinical Intervention Services (CIP) and Youth Clinical Intervention Services (YCIP) are also quantified under Treatment Program Admissions. FY02 SATOP data is corrected from previous report.

**** In this table, client admission counts are unduplicated by client state identification number and facility code and represent the number of clients admitted to each facility.

Statewide, regional, county, and category totals may not match due to non-inclusive categories, incomplete data, and services to Missouri non-residents.

Mental Health Provider	348	238	239				
Health Care Provider	102	147	181				
Court / Criminal Justice	1,909	2,045	2,308				
Other	496	609	805				

*** SATOP clients referred to Clinical Intervention Services (CIP) and Youth Clinical Intervention Services (YCIP) are also quantified under Treatment Program Admissions. FY02 SATOP data is corrected from previous report.

**** In this table, client admission counts are unduplicated by client state identification number and facility code and represent the number of clients admitted to each facility.

Statewide, regional, county, and category totals may not match due to non-inclusive categories, incomplete data, and services to Missouri non-residents.
